## Press release

**From environment and energy to occupational health and safety**
# Implementing ISO standards with Quentic software

*Berlin, January 10th, 2019*

The HSE and CSR software Quentic is designed to support complete management systems according to ISO 14001 (environment), ISO 50001 (energy), and ISO 45001 (occupational health and safety). In recognition of this, DEKRA Assurance Services GmbH, one of the leading providers of certification services, has just renewed their official confirmation. Markus Becker, CEO of Quentic, explains: "Since 2010, regular audits show that our users receive a proven support system for the implementation, maintenance, and optimization of their management systems. Our online solution allows companies to effectively prepare for and carry out certifications. In this way, they're not only driving the continuous improvement process forward, but also strengthening the trust of consumers, suppliers and business partners in a sustainable way."

The international standard for occupational health and safety was not published until March of 2018. ISO 45001 will replace OHSAS 18001 in 2021, but is much more comprehensive: it emphasizes organizational contexts, considers working conditions along the whole value chain, and brings focus not only to risks, but also to opportunities for improvement.

As one of Quentic's first customers, BayWa r.e. Rotor Service GmbH, was successfully certified according to the new DIN ISO 45001:2018 standard. The leading provider of rotor blade services for wind turbines has used Quentic to map its occupational health and safety management system. Tobias Bittkau, who serves as Global Head of Services at BayWa r.e. and is also responsible for BayWa r.e. Rotor Service GmbH, elaborates: "We always attach great importance on health and safety at work and we are proud to have successfully completed the certification process. By using Quentic software, we ensure that all our HSE stakeholders are involved – from managers and employees to suppliers and other business partners. This is a central prerequisite to meet the holistic aspiration of ISO 45001."

***Quentic** is one of the leading specialists for HSE and CSR software and services in Europe. The company is headquartered in Berlin and employs more than 170 people. Its executive board is made up of Markus Becker (CEO), Sebastian Mönnich (COO), and Hardy Menzel (CTO). Subsidiaries and partners are located in Germany, Austria, and Switzerland, as well as in Finland, Denmark, and the Netherlands. Over 600 customers strengthen their HSE and CSR management with **Quentic software solutions**. With eight combinable modules, the online platform handles Health & Safety, Risks & Audits, Hazardous Materials, Legal Compliance, Online Instructions, Processes, as well as Environmental Management and Sustainability. It is Quentic's mission to connect, engage, and inspire all HSE and CSR stakeholders – via their browsers or with Quentic's App. As tasks interlock across departments, locations, and countries, Quentic helps businesses efficiently control their processes according to legal requirements.*
